

# **CACHE COUNTY ASSET AUDIT**

## **Public Works, Vegetation, Roads**

---

December 14, 2022

## **OFFICE OF THE COUNTY CLERK/AUDITOR**

### **Audit Leadership:**

County Clerk/Auditor: Jess W. Bradfield

Deputy Internal Auditor: Katherine Becker, CFE

Project Name – Road Asset Audit	Workpaper Index # 7
Workpaper Name – Final Draft	June 2022 Review

## PURPOSE

To audit the depreciating assets of Cache County for continuity between tangible assets of the Public Works, Vegetation, and Road Departments), Depreciation (Finance Department), Insurance Coverage (Human Resources Department), and Titling (Clerk/Auditor's Office).

## PROCEDURES PERFORMED

The Auditor collaborated on reports from the four departments listed in the purpose section of this report. Before the cross-examination of said reports, the Auditor met with the road department to ascertain pain points in maintaining an accurate department asset list.

On June 27th, 2022, the Auditor reviewed the process currently in place with the finance department, Cache County Public Works, Vegetation, and Road Department, and IT. As enumerated in the following findings report; it was determined that the current in-house system (created to track depreciative assets) is underutilized and lacked buy-in from end-users to successfully meet the needs of the County.

## FINDINGS

On June 27th, 2022, the Auditor reviewed the process currently in place with the finance department and IT. As enumerated in the following findings report; it was determined that the current in-house system (created to track depreciative assets) is underutilized and lacked buy-in from end-users to successfully meet the needs of the County.

As it is, the County is currently using 5 software and/or web applications uniquely by department or office to track the same data as none of these systems integrates with the others.

The Cache County Public Works, Vegetation, and Road Departments use the program iWorq to track the asset roll and maintenance of their fleet vehicles. This program is no longer updating or meeting the needs of the department. They put in the initial FY 2022 budget funding to acquire new fleet & equipment management software but as of the data pull the request had not been approved.

The Cache County Information Technology Department was tasked to create an asset tracking database with part of its use being the management of the Vegetation and Road Departments fleet. The motivating driver of creating the in-house system left County employment early into its creation and implementation. Though the framework and intent remain, the lack of Department buy-in on both the creation and the end use of said database renders it ineffective. Additionally, a lack of training on its intent and use has stopped short of the database's continuity. The issues deriving from this are enumerated below.

## **Finding 1 – Insurance**

Hard copies of insurance cards are collated by department and distributed before the previous card's expiration. As the IT-created asset database is not up to date specifically about County-owned vehicles, some insurance cards were distributed to the wrong departments.

Additionally, in the review of the lists attached it is apparent that a communication gap exists that either delays or skips the purchase of a new asset from making it onto the County's insurance roll.

Further Review Encouraged: Why do insurance cards need to be printed and placed in every vehicle when the policy number hasn't changed in years and the cards don't have unique identifiers assigned by the company?

## **Finding 2 – Mass Approval**

The IT-created asset database creates a queue for the Department head to approve of additions, removals, and transfers of assets in and out of their respective department(s). For efficiency, there is a mass approval option rather than approving each transaction individually. The mass approval button for changes in the IT system is not functioning; Specifically, the clicking of the mass approval button creates no action in the system. This added layer of complexity and the Department head that was walking me through the system had over 170 changes pending approval.

**Action Item:** IT was able to replicate the error and is working on a patch.

## **Finding 3 – Clarification on What Constitutes an Asset**

The Cache County Public Works, Vegetation, and Road Department Head did not understand why certain items were listed in the IT-created database that he was mandated to track. Specifically, road improvements such as asphalt. The auditor explained that the road improvements listed are a depreciating asset, even though the land is not; Therefore, all road improvements are showing up as tangible assets in the IT System.

**Action Item:** The Finance Department was asked if these may be omitted or if an additional designation is assigned. It was stated that no new road improvement assets had been entered in 2 years and the department head is welcome to remove them from their list. The improvements sitting on that department's asset list were part of the initial data pullout of Caselle.

## **Finding 4 – Current Process of Asset Tracking**

When an asset needs to be acquired the following process ensues:

- 1) Department Head requests that the admin create a purchase order
- 2) Department Head submits a Purchase Order to County Executive
- 3) If funds are available in the requested budget line item, it is likely approved
- 4) The asset is ordered or purchased

- 5) Upon physical receipt of the asset, a title or invoice is brought to Angie in HR to enter it on the Liability Insurance schedule
- 6) Cache County Public Works, Vegetation, and Road Department is supposed to enter the asset into iWorq
- 7) Finance Department enters it into the IT system on an average quarterly basis
- 8) Finance Department enters the asset into Caselle upon receiving the Purchase Order
- 9) Cache County Public Works, Vegetation, and Road Departments admittedly only use the IT system for surplus and inter-County transfers. All other data is tracked in iWorq.

**Action Item:** Cache County Public Works, Vegetation, and Road Department Head is unaware of how/why/what assets are entered into the IT system. Pointed out that they have contracted to buy two variable message boards at \$15,000 each. One has been received and is currently not on the County insurance schedule.

**Action Item:** Requested invoice from Finance for Angie; Finance responded that no invoice had yet been received only a PO; Matt is looking into this; Angie needs Make, Model, Serial #, Year, & Replacement value.

**Further Review Encouraged:** What would it take to encourage the use of the IT system? It would require a lot of customization for the current system to be able to compete with existing software. Additionally, it would take someone in elected office to "champion" and drive use and implementation through collaboration as well as County policy.

**Met with the Finance Department on June 29th to discuss the history and intent of the use of the IT asset management system.**

- 1) Road vehicles are part of the "Special Service District for Roads" and require a separate GASB-34 Entry.
- 2) The Finance Department is admittedly 6 months behind in entering assets into the system based on invoices.
- 3) The list intended to mitigate physical paperwork concerning surplus as well as to assist Department Chairs to meet their statutory requirement to track all assets above \$500 and less than \$5,000.
- 4) The Finance Department uses Caselle for calculating depreciation. Do not as yet trust that the IT system data is complete or accurate due to lack of use.
- 5) The IT system is a great tool to track the chain of approval as well as ownership. No asset should be put in surplus or transferred without the consent of the Elected over that department.
- 6) Finance is aware that the system is still in its vetting stage and no training has been given on its intent or use. However, they are open to the purchase of vendor software IF it reduces the current redundancies of data entry.
- 7) Asked about .csv import capability; said currently that would cause items to duplicate as every department uses its unique identifier (Caselle, Utah Trust, iWorq).
- 8) Assets are allegedly used heavily in the IT department. So, if the IT system were discontinued Countywide, it still holds substantial value to the information technology department, and the time building the system was not wasted.

**Other Items Requested be Reviewed by Department Head, if Approved:**

- 1) Change all County records referencing "WEEDS" to "VEGETATION"
- 2) Porcupine Canyon Road Issue
- 3) Interlocal Agreements for Municipalities about liability for repair and maintenance of their water/sewer/electric in the County's right of way
- 4) Asked on fee schedule how to handle municipalities? Currently, it is not consistent.
- 5) County Gravel pit is having neighbor issues. Need to send a 30-day cancellation on the easement.

**Action Item:** Reviewed original deed to verify if the terms are 30 days after written notice.

*County: 08-044-0014*

*Nixon: 08-044-0010 & 08-024-0003*

*Smithfield: 08-044-0013*

- 6) Look into the UDOT parking lot with the intent to purchase and pull any prior agreements with the Fire Department when they housed equipment on this lot. Ensure indemnification on events occurring on UDOT property involving the County's chip seal pile.

**Action Item:** Reviewed County MOUs, agreements, and contracts, and none formally existed for shared use or indemnification.

*13-048-0007 & 13-048-0006*

- 8) Parcel of land was given to the County to fund improvements to a trail further south. Upon review of GIS mapping, both East & West neighbors are blatantly encroaching onto the County's property. However, this Parcel has no access or easement (that we are aware of) and is landlocked.

*Squatters (E): 17-002-0033*

- 9) IT Asset system & Insurance Trust sheet sent in June is missing the following item:

*1GC4YTEY2NF207794*

## **CONCLUSION**

The County is expending monies on multiple software to track the varying aspects of County assets from depreciation, maintenance, insurance coverage, department assignment, and acquisition. It has not been fully explored on whether these independent systems have the ability to share data rather than depending on each user to hand-key what is necessary to complete their job functions. It would benefit the County to seek an interface that works with all or the majority of the necessary departments that handle one or more of the aspects listed above. With these processes relying solely on data entry, there is a higher risk of human error which leaves the county prone to liability.

## CONTRACT FOR ROAD DEVELOPMENT SERVICES

THIS CONTRACT is made and entered into by and between CACHE COUNTY, a county corporation of the State of Utah, which shall be called the "County" in this agreement and CACHE COUNTY ROAD SPECIAL SERVICE DISTRICT, a special service district created and existing under the laws of the State of Utah, which shall be called the "District" in this agreement.

This contract is made and entered into by and between the parties based upon the representation that the District was created in order to be eligible to receive mineral lease funds pursuant to Sections 59-21-1 and 59-21-2, Utah Code Annotated, 1953 as amended, from the Utah State Mineral Lease Account. The District was established for the purpose of constructing, repairing and maintaining roads within Cache County with the mineral lease funds. The County has the responsibility under State law for the construction, repair, and maintenance of County roads and the mineral lease funds received by the District could appropriately be applied to the road program of the County.

Therefore, in consideration of the conditions contained herein, the parties hereto do hereby agree as follows:

(1) The District shall pay to the County all mineral lease funds received by the District pursuant to Sections 59-21-1 and 59-21-2, Utah Code Annotated, from the Utah State Mineral Lease Account as received. The District may, however, cause its paying agent to pay from said funds any actual lawful expenses incurred by the District.

(2) The County shall use the funds received hereunder for road development services including the construction, maintenance, and servicing of County roads under the current County road program and as approved by the District.

(3) This contract shall be subject to revocation by either party upon ninety (90) days written notice to the other party.

(4) The County shall provide to the District an accounting of the receipt and disbursal of the funds received hereunder, and a report of the road improvement projects paid for by these funds.

DATED this 28 day of Feb, 1990.
